ALL-WHEEL CONFIDENCE. INSTANT EV TORQUE.

Musso EV's dual-motor all-wheel drive system brings immediate traction, balance and control to every surface. With motors on both axles and real-time torque redistribution, it reacts instantly to changing grip levels, whether you're on gravel, mud or wet roads. Add in brake-integrated stability control and smart power management, and you get a pickup that feels sure-footed and smooth, even when conditions are anything but.

CAPABILITY

CARRY THE EXTRAORDINARY

For work and adventure. The Musso EV doesn't just carry cargo, it carries the legacy of a pick-up that's done the hard miles and come back for more. With a wide, deep and seriously usable load bed measuring 1,345mm long, 1,515mm wide and 510mm deep, the Musso EV is built to move big things without breaking a sweat. Euro-pallet? Easy. And because it's a KGM, clever design comes as standard, with a wide-opening tailgate, integrated tie-downs and a tough, load-ready liner. Whether it's tools of the trade or toys for the weekend, this is a load space that lets you escape the limits of convention.

SPACE FOR EVERYTHING

Deck Rear Bumper Steps

8 Cargo tie-down hooks

ESCAPE THE TARMAC

Combining the proven toughness of a true pick-up with the instant torque and control of electric power, it's designed to tackle rough terrain with confidence and composure. A spacious five-seat cabin keeps everyone comfortable, while its secure load deck is ready for work or adventure, making Musso EV the perfect escape when the road runs out.

Full-time AWD

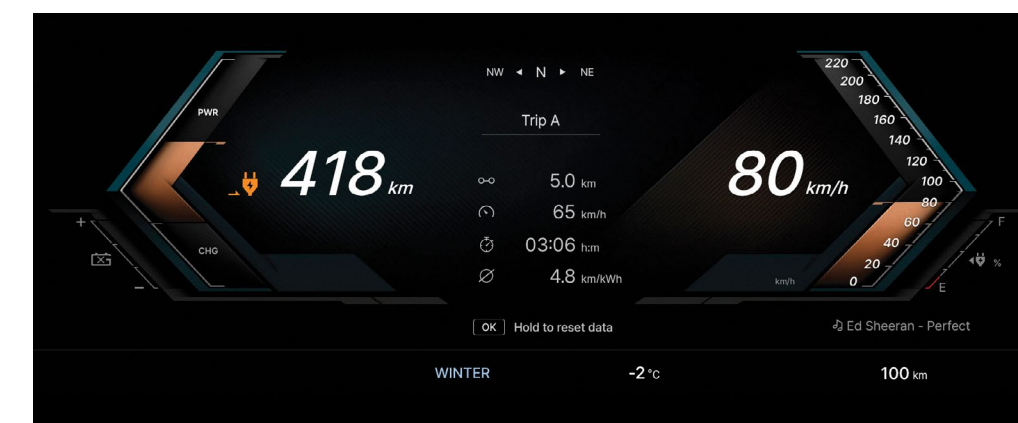

SERIOUS 4X4 CAPABILITY

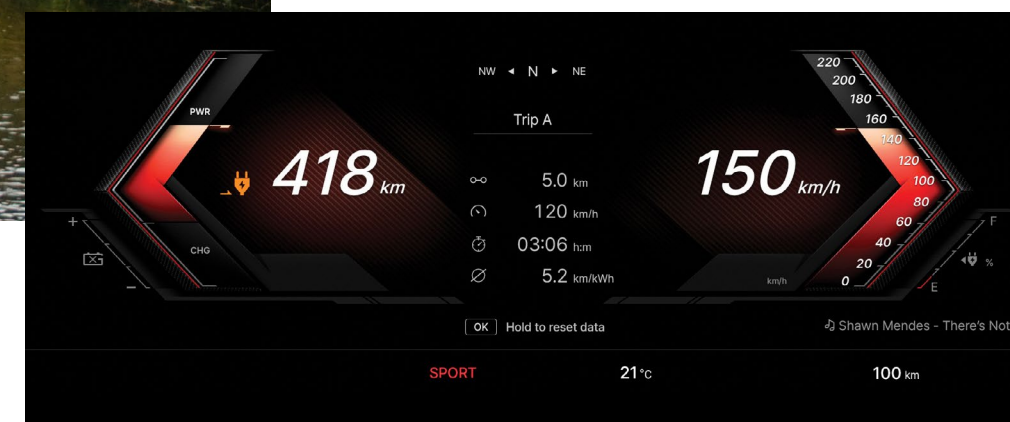

GOING THE DISTANCE

The Musso EV pairs practical utility with electric-vehicle efficiency. It uses an 80.6 kWh lithium-iron-phosphate battery and in its 4WD configuration delivers an estimated WLTP driving range of around 260 miles of city driving on a single charge.

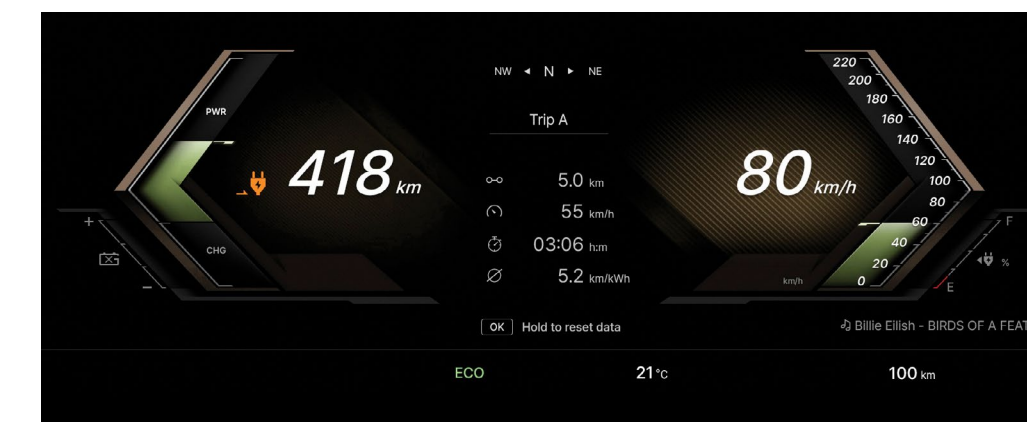

Coupled with intelligent drive modes, Musso EV adapts to you and the road ahead. Switch seamlessly between Eco, Sport, Winter, and Smart modes to suit every journey, from efficient urban commutes to slippery backroads. Each mode optimises torque delivery, regenerative braking, and power use to keep you confident and in control, wherever you're headed.

SHAPED TO GO FURTHER

Musso EV's tough underpinnings are designed for life beyond the tarmac. With generous ground clearance and off-road-ready geometry, it's built to handle slopes, ruts and uneven ground with ease. The self-levelling rear suspension keeps your ride balanced under load, so you stay confident, no matter what you're carrying.

Explore capability

BEYOND CONVENTIONAL DESIGN

The Musso EV is designed to help you leave the everyday behind. Its bold, muscular exterior and confident stance reflect true pick-up strength, while clean, modern details give it a distinctive electric identity built for life beyond the tarmac. Step inside and the sense of escape continues, with a spacious, SUV-quality interior that blends comfort, technology and practicality in equal measure. Thoughtful design touches create a calm, capable space for long journeys and off-grid adventures alike; making Musso EV a place where work ends, the road opens up and the journey really begins.

Unique grille

BUILT TO CARRY, TOW AND CONQUER

TOWING

The Musso EV is more than just KGM's first electric pickup, it's a workhorse powered by innovation. With the capability to tow up to 2,300kg and carry 690kg in the load bed, it's engineered to take on tough tasks with zero tailpipe emissions. Whether you're hauling gear, towing a trailer, or heading off the beaten track, the Musso EV delivers uncompromising performance, with the added confidence of a full-time all-wheel drive system.

Trailer sway control

Driving stability is improved by automatic detection and stabilisation when the trailer begins to yaw or sway.

Front and rear parking sensors

INTERIOR & CONNECTIVITY

THICK SKIN, SOFT INTERIOR

Expansive space throughout the cabin gives every passenger room to relax, with a rear seating area designed to feel open, effortless and accommodating. Forward-thinking design, seamlessly integrated technology and premium finishes create a modern environment that feels intuitive and in control. It's a space that balances comfort with confidence, inviting you to break from the routine and enjoy every mile, wherever the road leads next.

The second-row sliding and reclining functions maximize comfort on long journeys, making family trips even more enjoyable. These features enhance versatility while maintaining a spacious and relaxing interior.

INTERIOR DESIGNED

Get comfortable and discover the advanced state-of-the-art infotainment system. Musso EV features a 12.3" touchscreen with Tom Tom navigation, Apple CarPlay and Android Auto to play your favourite driving tunes and podcasts whilst also keeping you on track.

CLARITY AT YOUR FINGER TIPS

Heated Steering Wheel

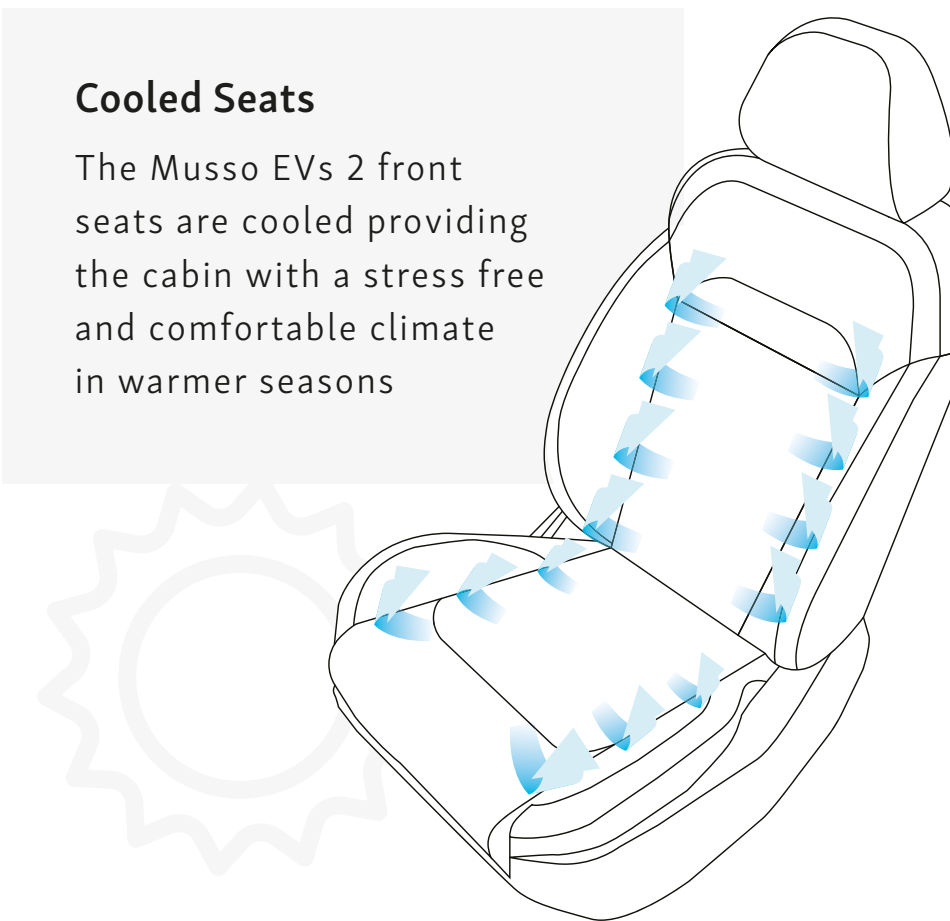

Heated Seats

All 5 seats are heated to give driver and passengers that extra boost of warmth in the colder months.

Cooled Seats

The Musso EVs 2 front seats are cooled providing the cabin with a stress free and comfortable climate in warmer seasons

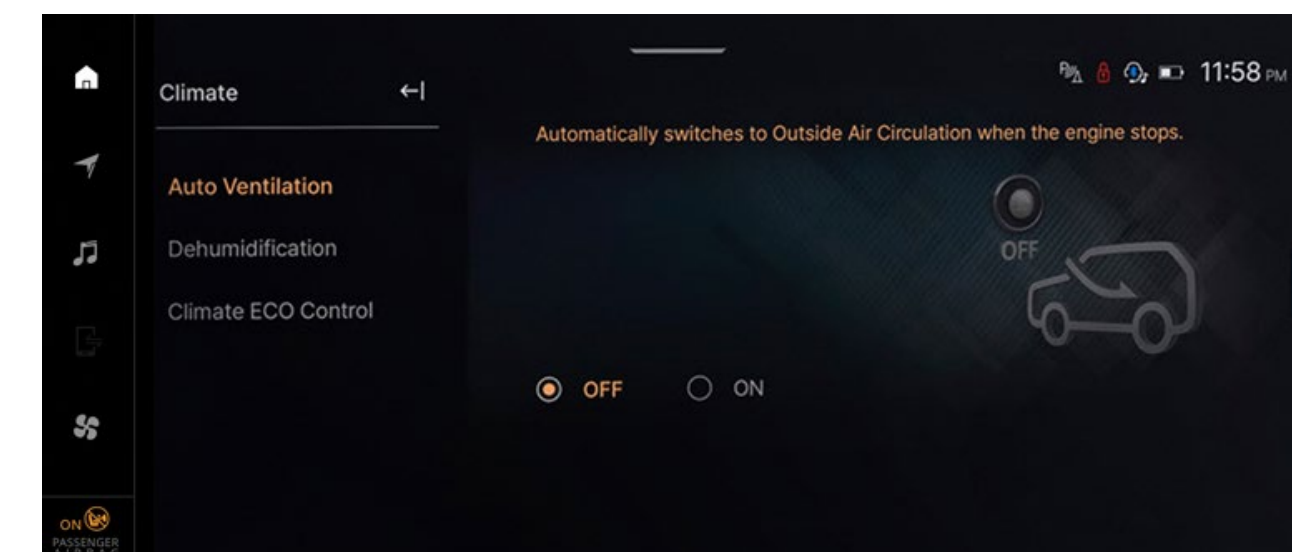

IN COMFORT, IN HARMONY

Koreans talk of 'Noon-Chi'. It's a phrase which means being in touch with the feelings of others and in harmony with your environment. Musso EV has the 'Noon-Chi' you need for a comfortable, harmonious drive.

Dual-zone air conditioning

Auto ventilation

Explore technology

THE FUTURE OF SAFETY

Musso EV is equipped to cope with extremes. The safety measures are cutting edge and built-in to provide maximum security and reassurance in the most testing environments.

8 AIRBAGS

Musso EV has 8-airbags for the greatest possible protection in the event of a sudden stop.

- 1 Driver airbag
- 2 Driver knee airbag
- 3 Passenger airbag
- 4-5 First-row side airbags
- 6-7 Curtain airbags
- 8 First-row far side airbag

A carefully engineered body structure, impact-absorbing steering components and high-strength materials are all designed to reduce the effects of a collision, creating a strong, protective environment that lets you drive with confidence and focus on the journey beyond.

SMART SAFETY

Intelligent Cruise Control

Intelligent adaptive cruise control maintains a safe distance from the vehicle ahead, smoothly managing acceleration, braking, stopping and restarting as traffic flows..

Lane Keeping Assist (LKA)

LKA uses a front camera to monitor the painted lane markers. On detecting an attempt to change lane without prior signalling, it automatically corrects the electric power steering to keep the vehicle within the intended lane.

Autonomous Emergency Braking (AEB)

AEB Automatically activates full braking in an emergency to reduce the vehicle's braking distance to help avoid an accident.

Safety Distance Warning (SDW)

SDW detects the distance from the vehicle ahead and warns the driver when a safe distance is not properly maintained.

Blind Spot Detection

Senses vehicles coming up in the blind spot behind or alongside, the system warns with a flashing light on the outside mirror and warning sound in the cabin.

Rear Cross Traffic Alert

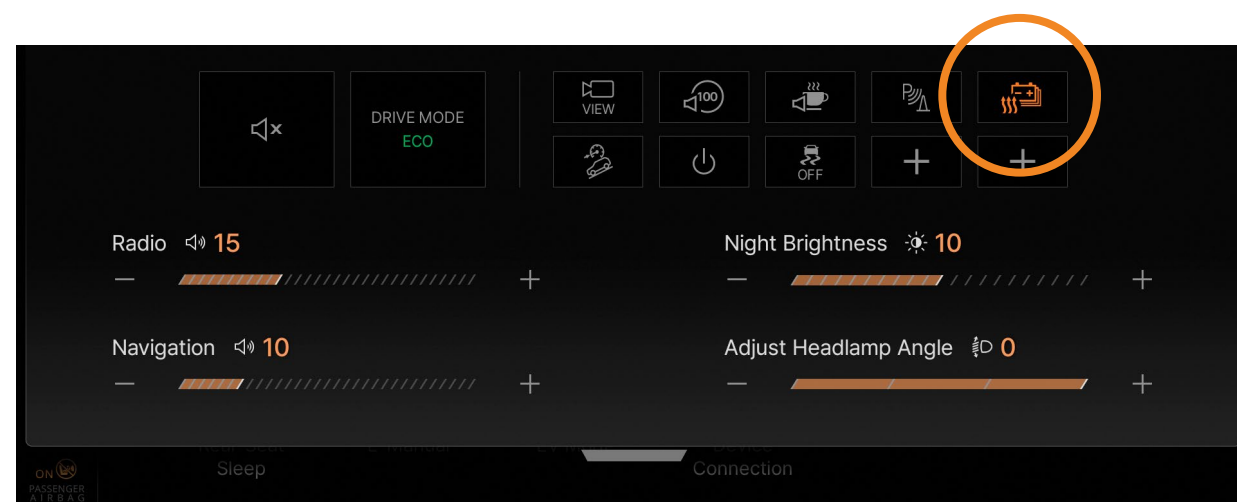

By using rear-corner radar, the system helps to prevent backing into crossing traffic by alerting when vehicles are detected.

LEAD THE CHARGE

Whether you're topping up at home overnight or charging while on the move, flexible charging options make it easy to stay ready for workdays and weekends away. Simple, convenient and efficient, Musso EV keeps you powered up so you can focus less on stopping and more on getting out there.

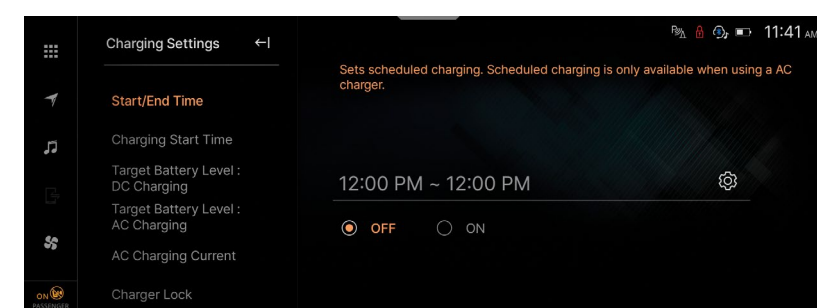

Battery Pre-Conditioning

Improves charging efficiency by preheating the battery, particularly in cold conditions.

Charging Settings

Sets the charging target level via the AVN when using slow (11kW) or rapid chargers, enhancing convenience and efficiency.

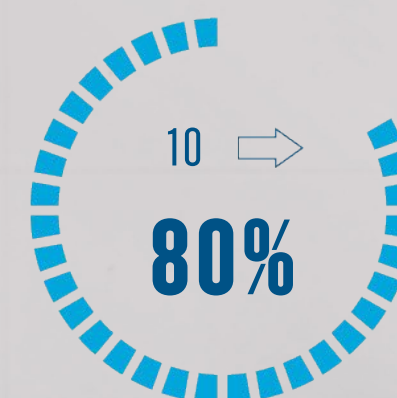

Scheduled Charging

Allows setting the start and end time for charging via the AVN when using a slow (11kW) or portable charger.

Charging Time by Charger Type

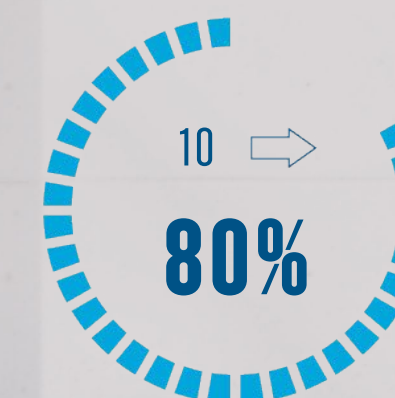

*At room temperature

300kW Charger

Approx.
36 min

100kW Charger

Approx.
